

7 Why listen? interesting advantages

1. Understand texts better

A study of the University of Regensburg has shown that absorption of information is 29% higher when listening than when reading; and reading and listening at the same time leads to a 44% increase in efficiency.

2. Better use of time

In leisure time, when travelling, in the office or during sport you can now also „read“, without having to stare at a computer screen or paper.

3. Detect errors faster

Listen to your manuscripts for speeches, lectures or presentations to check their effectiveness! Ugly wording, incorrect word order, forgotten words... Errors that are easy to oversee are immediately noticed when listened to.

4. Listen and relax

Put together your own audiobooks and listen to great works of literature.

5. Set yourself free from the screen

Give your eyes a break or move freely in your office, while listening to PDFs, Word documents, Epubs, Emails or memos.

6. Learn more easily

Convert your educational material to audio to listen to again and again. Mobile, where ever you want.

7. In many languages and voices:

With additional languages, you can also use Voice Reader Home 15 with foreign-language texts and sustainably improve your listening and pronunciation skills.

Many languages and voices

There are 67 voices in 45 languages available.
Among them are:

Catalan (2)	Hungarian (1)
Czech (1)	Italian (2)
Danish (2)	Norwegian (2)
Dutch (2)	Polish (1)
English (American) (2)	Portuguese (1)
English (Australian) (2)	Portuguese (Brazilian) (2)
English (British) (2)	Russian (2)
English (Scottish) (1)	Spanish (2)
French (2)	Spanish (Argentine) (1)
French (Canadian) (2)	Spanish (Mexican) (2)
Finnish (1)	Swedish (2)
German (4)	Turkish (2)
Greek (2)	Valencian (1)

The numbers in brackets show the available voices per language.
See all languages and voices on our website www.linguattec.net

System requirements:

- Operating system: Windows Vista, 7 or 8 (32- and 64-bit)
- Available disk space: up to 1 GB for each voice
- 2 GB RAM
- Internet access for product activation

The alternative for professional use: Voice Reader Studio 15

The professional version Voice Reader Studio 15 is the low-cost alternative to a recording studio. All audio files created with Voice Reader Studio 15 may be published without license. Create training manuals, presentations, E-learning content, traffic announcements or audiobooks.

Voice Reader Home 15 Direct offers you fast access to voice output from any other program.

Test for free! www.linguatec.net/onlineservices

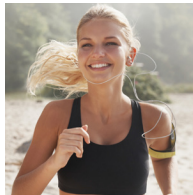

100 % mobile

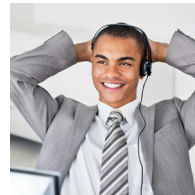

when travelling

in leisure time

during sport

in the office

You can convert any text document into an audio file in the blink of an eye and transfer it to your MP3 player, to listen to it in your leisure time - whenever, wherever and as often as you want.

Use the time you spend on the go every day: In the car, on the train or plane. Listen to key reports, learn a new specialist area, immerse yourself in your subjects, listen to your own audiobooks and all without tiring out your eyes.

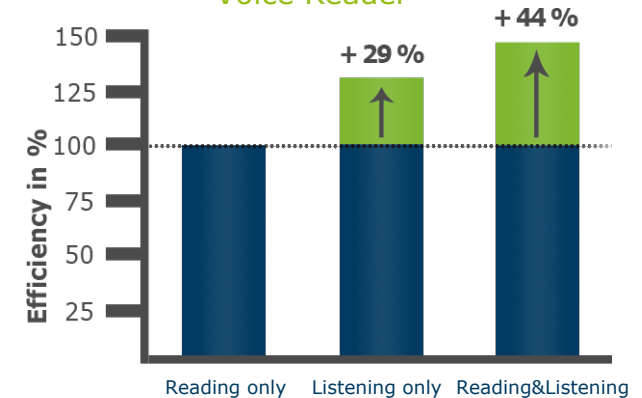

Why Listening is Better Than Reading

The University of Regensburg has thoroughly tested Voice Reader in a user study. It clearly showed that use of Voice Reader reduces the processing time for texts and noticeably increases text comprehension: our ability to take things in by listening is 29% higher than by reading. The best results were achieved by experimentees who read and listened to a text simultaneously. Here the improvement compared with those who just read the text was an impressive 44%.

Our recommendation: If you really want to maximize your understanding of a text, have it read out to you by Voice Reader. Maximum convenience is ensured with the adjustable reading tempo and synchronized text highlighting.

Efficiency Comparison Listening versus Reading while using Voice Reader

Efficiency = Text comprehension / processing time
