See how simple Voice Reader Web 15 is

You, as the website operator, simply integrate a ‚Read‘ icon on all of your webpages that you would like to be made audibly available to your visitors. It's as simple as filling out an intuitive web form and you're all set!.

Visitors to your website click on this icon and immediately begin hearing the desired page content on demand. This means that you don't have to store any audio files on your server.

Most important features of Voice Reader Web 15

- Functional audio player to achieve an optimum presentation on all modern devices (PC, tablet and smartphone) and in all browsers. Adapted to the newest web standards. Available in two versions.
- While reading, the text will be highlighted simultaneously.
- While reading, a visual text enlargement can be optionally activated.
- The reading function can be used in internet and intranet.
- Three different ways of integrating the player to the website.
- All players can be completely controlled via keyboard shortcuts.
- Beside reading out the complete webpage it is possible to only read out selected parts of the text by marking the text and clicking on the ‚Read‘ icon beside the text.
- Available in 45 different languages with male and female voices (the US English version for example includes 1 female and 1 male voice).
- Audio file export as mp3-file is possible.
- While creating the Voice Reader Web 15 link, you can define settings such as speed, pitch and text styles.
- Update your website as often as you want, Voice Reader Web 15 automatically reads out exactly what the text on your website says.
- Choose among many different ‚Read‘ icons (different styles and colours) or easily upload your own ‚Read‘ icon.

Voice Reader Web 15

Advantages for you as the website operator

- Easy installation of Voice Reader Web 15 via an intuitive web form.
- Improved usability of your website, visitors may listen to your content anytime, from anywhere and on any device.
- Better accessibility of your website for people with visual impairments, limited literacy skills, for foreign people, seniors, learners and in general for a better comfort and convenience of your website.
- Perfect for users of mobile devices such as smartphones or tablets.
- Audio files will not be saved on your server.
- When updating your website all changes will be read out automatically.
- Supports barrier-free access to your website.
- Available in 45 different languages and with male and female voices (the US English version for example includes 1 female and 1 male voice).
- Selection of two different audio players (Rich Player and Mini Player) in three different colours.
- Selection of many different ‚Read‘ icons in various colours and styles. Possibility to upload own icon.
- As website operator you can decide which part of your website will be read out.

Advantages for your website visitors

- Either the complete website or selected text parts can be read out.
- Text is highlighted while being read, the colour of the highlighting can be selected.
- While reading, a visual text enlargement can be optionally activated.
- Works on all mobile devices. It is no longer necessary to read texts on tiny screens, now it's time to listen.
- Player can be completely controlled via shortcuts. This increases usability for people with visual impairments.
- Visitors can either only listen to the text or read and listen simultaneously. A study of the University of Regensburg showed: Simultaneous reading and listening increases text comprehension.
- No waiting even with long texts.
- No installation effort required for website visitors.
- Option to download the dynamically generated MP3 file.

Voice Reader Web 15

Player

As website operator you have the possibility to decide between two audio players (Rich Player and Mini Player). Each player is available in three different colours (blue, grey and black) and scalable in size.

Rich Player

This player has the following function keys: Play, pause, sentence-by-sentence rewind and fast-forward, settings (definition of highlighting and text enlargement) and close. Player opens after clicking on the ‚Read‘ icon and can be integrated in three different ways:

1. Embedded: Directly embedded in the website, opens up on top of the webpage
2. Hover: Completely movable on the webpage
3. Pop-up: Opens up in a separate webpage

Mini Player

When clicking on the ‚Read‘ icon , a loading time signal shows up. When reading of the webpage starts a pause button  appears at the same position. After clicking on pause, the pause button changes to a play button  and reading stops. There are no further setting options available. The Mini Player is also scalable.

‚Read‘ icon

You have the possibility to select your ‚Read‘ icon from a variety of different icons in several colours and languages. Or just create you own icon. Find here a selection of different styles and colours:

Unrivalled in price

The price of Voice Reader Web 15 applies per domain and language, depends on the size of the website and is fixed, unaffected by clicks on the ‚Read‘ icon:

- For small and medium sized websites: 270 € / year
- For larger websites: 400 € / year
- For very large websites: Price according to agreement

We would be pleased to submit you an individual offer and reply to all your questions. On request we would be pleased to make a 30 days full trial version available.
